There's a chance you'll lose your whole investment.

Investment risks:

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

WHO WE ARE?

Omega coin is the World's First Ecosystem that Scaling Decentralized Applications. Our revolutionary blockchain service is designed to create your own blockchain ecosystem, secure digital assets and access to funding all over the world. Omega coin goal to become an intermediary is to simplify the transparency and security process by creating an accessible gateway to blockchain technology for the digital widely spread Real Estate and Commercial Payments arena.

Our Present Business Structure - We as the promoters behind the business idea are group of companies who are successful entrepreneurs with vast experience and knowledge base. We are established business house having business verticals in Hospitality / Travel and Tourism / Export / Trading and International Fund Management and Banking. Our business presence spans entire globe with multiple business houses and consulting offices. We as human society can understand the changing business.

The aim of omega coin is to enhance the industry for transactions on day to day business. These coins are created through the BEP platform and shared between participating parties on both the buy and sell side of marketing deals through IEO. The process utilizes multi layer protocol for tracking and the full platform for both encryption and interrogation of the contracts.

OUR MISSION

Omega coin is conceptualized as a smart technologies-anchored ecosystem aimed at solving the current problems associated with current conventional crypto trading & transaction processing services, including the delay in payment processing, fraudulent transactions, and expensive transactions costs. Further research into the smart technologies escrows ecosystems revealed that current financial systems benefit from the Bep20 technology, which can solve the underlying challenges. Every transaction on omega coin is registered on our blockchain to ensure unrivaled security and prove the ownership and origin of each item.

Making blockchain technology and cryptocurrency accessible to the masses, even if most don't know how it works. Technological advancements in the means of production are the driving force behind the changes in the prevailing system of socioeconomic relations. Feudalism was transformed into capitalism as a result of such advancements. While man obtained physical freedom, the financial freedom remained under the control of the centralized authority. A deep level of collaboration is required to attain the next level of productivity provided by new technological advancements.

OMEGA'S VISION

By providing unparalleled value, we will greatly accelerate the adoption of ICO Crypto systems. This will give our customers, our communities and our nation clean, abundant, low-cost transactions that will allow us to provide financial security for all our holders. We envision building an ecosystem that is a decentralized financial system that can only be created by appropriately managing people, value, ownership, and reputation.

Our Vision is to :

- To make blockchain technology and cryptocurrency accessible by the ICO technology, even if the majority don't know how it works.
- To create an ecosystem where different solutions can emerge from a social perspective, including collaborative applications.
- We are providing the atmosphere where the technology is used to allocate authentic ownership of assets in a solar.
- To ensure users own personal data, which will significantly reduce the current data leaks via centralized financial systems.

"What I find most inspiring about this business is that we put the power back in people's hands...." -Aaron Eriksson

ICO CRYPTO

ICO Crypto is #1 best selling ICO Landing page, which helps you launch and introduce your ICO Website. We designed it very carefully to make it more attractive, useful and fit any kind of ICO/Crypto website. ICO Crypto will be followed by the developer, but it will happen at the same time with some great effort and pain. For to come to the smallest detail, we do not exercise any kind of work unless it is beneficial. We create a cryptocurrency mining company, but this time it happens with some great effort and pain. For to come to the smallest detail, we do not exercise any kind of work unless it is beneficial.

As project owner/developer team we will working hard 24/7 to delivery on time as smoothly as possible so our goal can hit everyone's best interest. The company's current platform uses Secure Pocket and a double-checking method to hold all staked Omega tokens. As more people, including institutional investors, recognize the lucrateness of the crypto market, crypto staking is quickly becoming a trend of earning passive income by simply holding or locking funds in a wallet, though you cannot earn passive income by buying and selling this token until it is fully listed. Our Tokens with a real world use case created on the blockchain network. To ensure users own personal data, which will significantly reduce the current data leaks via centralized financial systems.

KEY FEATURES

Create a Secure Decentralize:

At a time when we are free to choose between options we can do nothing that pleases us the most. Decentralized finance (DeFi) has opened up a new, modern world for users who have been in large needs of returns for decades. The potential to earn passive income from DeFi is immense, and opportunities in this exciting space of constantly evolving platforms, protocols and exchanges are quite big.

Solving Small Business Problems:

If we can please, all pleasure must be roasted, all pain must be repelled. The idea is that no single entity has control over that ledger of transactions. DeFi is set to take over the financial services industry in the near future.

Personal Data must be Isolated:

For in our free time, when the choice is open to us, and nothing hinders, much less. They operate an open and decentralized marketplace, there are no third parties that oversee and implement withdrawal fees, identify verification, or sign-ups.

STAKING BENEFITS

It is advantageous in cryptocurrency as it generates rewards by holding the coin on any exchange and generating passive income. When an investor holds a coin and staking the pool, it is the easiest method to do, in a decentralized world. There is very sufficient energy consumption and stumpy probabilities of risks while staking than any crypto mining. Omega coin is here for you.

Passive Income:

Stake holders earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of staking.

More Cost Effective:

Proof of stake blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and ecofriendly. So, the stakes can earn more passive income by using Smart Liquidity Omega coin.

STAKING BENEFITS

Scalability:

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used or generated in a variability of ways. Proof of stake protocols, as shown by Omega coin higher transaction outputs and lower fees, make for greater scalability.

Echo Friendlier:

As Proof of stake blockchains are less energy consumers, they are more environment friendly. Thus, they have a lower carbon footprint and have little or no environmental effects.

Highly Secured with the help of Smart Contract:

The biggest issue in the modern world is security and privacy, and We provides a swift and stable portal that is backed by the Omega coin contract, making him superior to others. Omega contract is offering a highly secure and fast platform to the users for staking crypto.

UNIVERSAL ISSUES

DeFi is built to include all the advantages of a financial institution without any intermediaries which are common in centralized financial institutions. Intermediaries such as banks and insurances are now being operated by a smart contract. In simple terms, DeFi is a decentralized financial infrastructure built on a blockchain network. By utilizing decentralized apps (dApps), two or more parties can exchange, lend, borrow and trade directly using blockchain technology and smart contracts without anyone being involved and without added costs. It's a fair, free and open digital marketplace for all. Over the past year, decentralized finance has grown tremendously in the blockchain industry. Creating a whole new experience in financial technology. The trend rose, as companies started offering various financial products such as staking, lending, savings, etc. However, there is still a need for safe and robust means of investment. Still most DeFi apps are built on ETH (ERC-20 tokens) network. With these projects dominating the market, DeFi is experiencing many limitations. Many DeFi projects today have problems with higher transaction costs, speed, interoperability, rug pulls and so on.

OMEGA SOLUTIONS

There is an urgent need to address the dramatic decline of interest in the investment segment while eliminating the risk factors associated with the industry. The main objective of Omega is to narrow down these risk factors to a minimum, promoting the investment ecosystem and creating a new breed of investors. Using a strategic approach that will lead to a large growth in the investment segment. In order to achieve its decentralized goals, the protocol is supported by a native digital token - Omega Coin. This token operates on the ETH Network, and can be exchanged between users on a wallet-to-wallet basis.

Omega Finance you can diversify your crypto portfolio & earn passive income in just a few clicks and without third party sites. Everything you need can be found on our site. Omega coin also utilizes autonomous strategies that will minimize the effort needed to maximize your returns. Our company includes a group of innovators in various fields of smart business and always seeks to implement the concept of AI (artificial intelligence) in the field of investment, and we strive to achieve financial inclusion.

SMART OMEGA

Omega coin provides unique technology to its users. It's also not just for the super-rich who have it in abundance and are constantly looking for something extraordinary to spend their money on (See our '3 Most Expensive Gadgets' article to see how crazy the super-rich can be. Smart technology is readily available to a variety of people and is more common than ever. Programmable temperature settings, one-button central lighting control, remote controls that open and close the room's blinds... many use smart technology in our homes, but the big question is, do we really need it or is it all a little overrated? This is a financial arrangement where two parties in trade use a third party (who is neither a buyer nor seller) to hold money, assets or paperwork temporarily for a transaction on behalf of the parties before the transaction is finalized. Blockchains ensure that all transactions, such as the terms of an agreement are recorded accurately and transparently. It allows for release events with guaranteed terms that cannot be superseded by any regulatory interference. This becomes possible, since once a transaction is recorded on the blockchain it cannot be deleted, modified or altered.

WHY CHOOSE US?

Open for global participants:

Omega coin facilitates the transaction and brings them closer to a wider audience. An added benefit of Omega coin use is that it's completely decentralized, so p2p trading can be done freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. Omega coin has no border so these can be used no matter where you are located globally. This also has a huge effect on international payment fees.

The efficiency of payment transactions:

Standard transfers and foreign purchases typically involve fees and exchange costs. Since Omega coin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization requirements and wait periods.

WHY CHOOSE US?

Fast and secure:

Omega coin is different because of its potential features of security, privacy, transparency, blockchain technology, Farming, lending, P2P trading, and NFTs marketplace. We have created a platform to connect people through Solar.

Strong security:

Built and maintained to the highest security practices to ensure our users and their funds are always protected. We provides private and secure proprietary technology applications (app), decentralized exchange with its encrypted communication platform.

Free from corporate and government interference:

Our coin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the Inconvenience of typical authorization and waiting period requirements.

BENEFITS OF HAVING US

Omega coin will structure high volume of business portfolio and also help businesses across the planet with similar advantage. This will help consumers, business houses, traders, e-commerce platforms to seamlessly transform the existing models to crypto based environment, thus increasing profits and ease of business.

Global Acceptancy:

Cryptocurrencies are a borderless means of exchange allowing instant and cost-effective transactions worldwide. There is no waiting, no international fees and no limitations as to who can or cannot send funds to whom or when and where those funds can be accessed.

Blockchain Technology:

Blockchain is a distributed ledger technology (DLT) for record-keeping of cryptocurrency transactions. It is also a database to achieve independent verification of the chain of ownership of any and every amount.

BENEFITS OF HAVING US

Low Transaction Fees:

Most of the people feel this pain. But the use of omega coin takes this pain away. It means omega coin is the best cryptocurrency to invest in. Its users do not have to worry about expensive transaction fee and chargeback.

Instant Operations:

Well, it is the best solution for ultra-fast contactless international transactions. As a result, all transactions get completed within 15 seconds time only. This is why Omega coin is fast becoming the best cryptocurrency to invest in.

Easy Accessibility:

Paying with cryptocurrency is simple and convenient. Digital payments using smartphones instead of a credit card is awfully convenient. This is where the global business coin proves to be the best cryptocurrency to invest in. Meaning, you can make payments for anything using Omega coin.
